BULLDOG® Designs First Anti-Rattle Adjustable Coupler

PLYMOUTH, Mich., (April 10, 2017) -- BULLDOG®, the brand trusted for all heavy-duty towing needs, has designed the Rigid Mount Collar-Lok™ Coupler. Featuring an anti-rattle design to help eliminate movement while towing, a downward bias levels under load to improve articulation from the trailer to the tow vehicle. The coupler's force transfer feature resists damage and extends service life.

Featuring one-tool installation using four bolts, a hexagonal depression prevents nut rotation during assembly.

Available in a 7,000 lb. weight capacity with 2 in. ball (P/N 028584) and a 12,500 lb. weight capacity with 2-5/16 in. ball (P/N 028585), both couplers carry a limited five-year warranty.

"We know our customers have experienced movement and rattling – it is a common phenomenon with adjustable couplers," said Todd Walstrom, vice president/general manager of trailer/industrial products for Horizon Global. "To address this situation, we've created the first anti-rattle coupler in the industry. Now, users can focus on the road, rather than the distraction of the rattler of their trailer connection."

About BULLDOG®. Bulldog® gooseneck hitches, gooseneck couplers, trailer couplers and wedge-latch elements feature a high-strength, heavy-duty design that makes them the most Tough and Trusted trailer components available today. Since 1920, the Bulldog brand has been the choice of Military and Manufacturers everywhere. Bulldog® jacks in particular are built with uncompromising strength and materials engineered to hold up under rigorous working conditions. The secret to success is having equipment you can count on and Bulldog is the perfect choice where trailering is concerned. For more information, please visit <http://www.bulldogproducts.net>.
